- Database

Review

Panic, Defer, Recover

```
package main

import "fmt"

fun main() {

    defer func() {

        str := recover()

        fmt.Println(str)

    } ()

    panic("PANIC")

}
```

Package

- src : contains all source
- bin : contains all binary file (executable)
- pkg : compiled package

Go Routines

- Concurrency gift by go language
- Thread mechanism in Go
- Connect with channel

Database
